

GPS

SVN (space vehicle number)	Block+Number	Name	PRN
G039	IIA-12	USA-92	09
G050	IIRM-8	USA-206	05
G060	IIR-12	USA-178	23
G073	IIF-11	USA-265	10
G074	III-1	USA-289	04
G076	III-3	USA-304	23

Notes: PRN (pseudo random noise) number are an identifier that only need to be unique for current active satellites. Once a satellite is retired, it's PRN will be available to be assigned to a new satellite - be careful to double check SVN or other identifiers.

GLONASS

GC (ground control) number	Name
R717	Kosmos 2426 (Retired 2019)
R719	Kosmos 2432
R720	Kosmos 2433
R734	Kosmos 2458 (Retired 2018)
R735	Kosmos 2461
R801	No information
R802	No information
R855	No information

Notes: GC number only has to be unique during operational lifetime of satellite - double check when comparing satellites with the same GC number that they are indeed the same!

GALILEO

Nickname	Name	PRN
E102 (GSAT0102)	Galileo-IOV FM2	E12
E202 (GSAT0202)	Galileo-FOC FM2	E14
E203 (GSAT0203)	Galileo-FOC FM3	E26

BeiDou

Name	PRN
Compass-IGSO2	C007
Compass-IGSO6	C015 (now C013?)

Notes: For the BeiDou satellites, PRN does seem to be a unique identifier (need to confirm)
